

BLYTHMOOR

Sales List - 2010

Does

\$350 Blythmoor Gingersnap 2*M – 2 year old doe in milk, producing 2.5# daily as a second freshener. Second generation star milker. Ginger is maturing nicely and developing more body. She has great width and levelness in rear structure and her milk production just keeps improving. Udder is well attached, nice sized teats and milk easily. 19.5" LA ++++ 83

GrCH Mystic Acres Snapdragon +B x Sugar Pine Myst *M

\$350 Blythmoor CW Mulberry *M – 3 year old doe in milk, producing 3.5# daily and 7% butterfat. Mulberry is not very tame (which is why she's priced so low), but is fine with routines like getting on the milk stand. Mulberry has lots of moonspots and is a very pretty doe. She throws lots of color and is an easy kidder. Mulberry is sound on feet and very dairy. A nice doe that could use better rear udder attachments, but has a good medial and milks well. 20" tall LA VVV+85

Camanna ZH PT Cruiser x Blythmoor Winning Colors

\$300 – Spots R Us Tina *M – Tina is a 3 year old doe that I purchased to finish her milk star. She is milking about 3# a day as a second freshener with well over 7% butterfat. She had triplets this year. Tina is a well put together doe with a beautiful udder. Good attachments, good medial and nice sized, well placed teats. 21"

GCH Mystic Acres Snapdragon +B x Martin's Darling Breathospring

DOE KID \$400 – **Blythmoor ST Calamity Jane** - This is a special kid out of my new doe TwinCreeks Tiramisu. She had twin does, so one is available. Misu comes from a solid milking pedigree and is milking over 3# as a first freshener.

GrCH Mystic Acres Snapdragon x TX Twincreeks Tiramisu
